SetKernel
DIGITAL INC.

SETKERNEL.COM

AI for small business, on technology built properly.

We put AI to work in small businesses (receptionists, automation, Copilot, private AI) and run the IT, security, and websites underneath it. One senior team.

WHAT WE DELIVER TODAY

AI receptionist

A voice and chat agent on your own number and site that answers, books, takes orders, and hands the hard calls to a person.

Workflow automation

Inbox triage, quote and invoice drafting, data entry, and CRM upkeep, with a person approving anything that leaves the building.

Copilot, ChatGPT & Claude rollout

The right assistant for your team, set up on business plans with sane data controls, a written use policy, and training built around real jobs.

Private AI on your documents

An assistant that answers from your own policies, manuals, and past work, cites the page it used, and stays inside your account.

AND EVERYTHING IT DEPENDS ON

Websites, software, infrastructure, IT and security, run by the same senior team that sets up your AI.

HOW TO START

Write to hello@setkernel.com, or use the form at setkernel.com/contact. You get a reply within one business day, Monday to Friday, Atlantic time, and no sales calls.
